# CONTINUOUS STEAMER AURA

## MAIN FEATURES:

. This ager is ideal for the steaming and colour fixation process for all kinds of knitted and woven fabrics like cotton, silk, wool, (all natural) and chemical fibre which are printed. This machine is especially designed for the digital printing industry and for small batch steaming

. The fabric feeding & outlet frames are made of Q235A steel sheets with folded edges and the main body of the box is SUS304 stainless steel. Condensation proof devices, circulation systems, heat regulators make this machine a perfect solution for the steaming system
